ESTIMATES OF POPULATION

1910, 1911, 1912, 1913, 1914

WASHINGTON
GOVERNMENT PRINTING OFFICE
1914

LETTER OF TRANSMITTAL.

DEPARTMENT OF COMMERCE,

BUREAU OF THE CENSUS,

Washington, D. C., March 31, 1914.

SIR:

I have the honor to transmit herewith a bulletin presenting the estimates of population in 1910, 1911, 1912, 1913, and 1914 for the states and territories, and for cities which had 8,000 or more inhabitants in 1910.

The term "city" is applied to municipal corporations, although all places shown are not chartered as cities, but many of them as boroughs, towns, and villages.

The Bureau of the Census has been directed by Congress to prepare in the intercensal period special reports which do not relate to the census year but to the year in which the statistics were taken. The returns of population at the previous censuses are not comparable with the data presented; it has, therefore, become necessary to compute the population for the years subsequent to the enumeration.

These estimates are prepared primarily for use in this bureau in computing death rates and per capita averages for years other than the census year. Bulletins 7 and 71, issued in 1904 and 1907, containing similar data, met with high commendation as furnishing figures that were needed to compute birth rates, death rates, and per capita averages for intercensal years.

Much of the information upon which the estimates are based was supplied by the city officials and postmasters, and it gives me great pleasure to acknowledge the courtesy shown by these officials in supplying maps and detailed information in regard to changes made in the city boundaries, together with estimates of the population of territory annexed and detached.

This bulletin was prepared by Mr. Charles S. Sloane, geographer, Bureau of the Census.

Very respectfully,

Director of the Census.

Hon. WILLIAM C. REDFIELD,
Secretary of Commerce.

(3)

ESTIMATES OF POPULATION: 1910, 1911, 1912, 1913, AND 1914.

The present bulletin contains the estimates of population of the United States, the states and territories, and the cities with a population of 8,000 or more on April 15, 1910.

Estimates of population for the years subsequent to the census are demanded for the annual reports of the Census Bureau, for the annual mortality reports of cities and states, and are also required by several Government bureaus and many public service corporations.

So much interest has been evinced in these estimates that it has been deemed advisable to publish them in such a form that they may be available for use by health officers in those states which have an established system of registration of deaths, also by other statisticians who need population data for years subsequent to the census enumeration.

Bulletin 7, issued in 1904, supplying estimates of population for 1901, 1902, and 1903, and Bulletin 71, issued in 1907, supplying estimates for the years 1904, 1905, and 1906, were criticised by the officials of some of the ambitious cities that had been growing at a rate much above the normal. The complaints, however, were much fewer in number and less violent in tone than the complaints that followed the announcement of the results of the enumeration of the census of 1900.

It must be apparent to any person who reads the text of the bulletin that the figures presented are not to be considered in any sense as a census, or as based upon an extended investigation of local conditions that may affect the growth of a municipality.

The so-called arithmetical method was adopted for computing the estimates of population. It is the simplest and it has been shown by experience to come nearer in accuracy in the majority of cases than any other formula. It rests on the assumption that the increase each year since the enumeration is equal to the annual increase from 1900 to 1910.

In the previous bulletins, when the censuses were taken exactly 10 years apart, the annual increase was assumed as one-tenth of the decennial increase, but, as the time of taking the enumeration in 1910 was changed from June 1 to April 15, the time elapsed has been considered as 118.5 months. The annual increase from 1900 to 1910 is obtained by dividing the total increase by 118.5 and multiplying the quotient by 12.

In order that all states and cities may be treated uniformly, it has been decided to use in computing

these estimates the population as returned at the Twelfth and Thirteenth Censuses only, abandoning the use of any state or other enumeration, allowance being made for the population of any annexations and detachments of territory that have been made since April 15, 1910.

The data regarding changes in area were secured by correspondence with city officials, and, where no replies were received to communications, the postmasters have been called upon and have supplied this bureau with the information needed.

The change in the date of the enumeration of 1910 necessitated a change in the date of making the estimates. As the statistical data are collected for the calendar year, in computing the rates and averages the midyear population must be used, consequently the date of the estimates was changed to that of July 1, considering this the midyear.

The estimated population given for 1914 is projected and, consequently, does not make allowance for any annexations or detachments of territory that have been made since July 1, 1913; these estimates, therefore, are liable to revision.

The list of municipal corporations, including the New England towns, with a population of 8,000 or more in 1910, numbers 777; of this number, 32 decreased in population from 1900 to 1910. For 30 of these cities the population returned April 15, 1910, is inserted each year, in lieu of an estimate showing a continuous decrease.

For two of the cities, Galveston and St. Joseph, estimates have been computed on a different basis. Galveston was assumed to have increased since 1910 at the same rate as from 1890 to 1900. The enumeration of St. Joseph in 1900 was evidently incorrect, and the estimate is based on the 20-year increase from 1890 to 1910.

The estimated population of continental United States July 1, 1914, is 98,781,324. The estimated population of the 777 municipalities is 39,682,685. The proportion, therefore, of the population in the 777 municipalities is 40.2 per cent of the total.

The diagram on page 6 is a graphic presentation of the estimated population for July 1, 1914, and the population as returned at each census from 1790 to and including 1910, also the proportion of the population in municipalities with 8,000 or more population.

ESTIMATES OF POPULATION: 1910-1914.

Table 1 gives the area of the United States and its outlying possessions in 1910, also the population in 1910 and 1900, with an estimate of the population July 1, 1914, 1913, 1912, 1911, and 1910.

In Table 2 is shown, by states, the land area as of July 1, 1913, the population April 15, 1910, and June 1, 1900, and the estimated population July 1, 1914, 1913, 1912, 1911, and 1910.

Table 3 presents, by states, the number of municipalities with 8,000 or more population April 15, 1910, with their population at that date, and their estimated population July 1, 1914, 1913, 1912, 1911, and 1910, and the population outside such municipalities.

Table 4 shows each municipality with 8,000 or more population in 1910, arranged alphabetically by states, the land area July 1, 1913, the population at the Twelfth and Thirteenth Censuses, and the estimated population for July 1, 1914, 1913, 1912, 1911, and 1910.

In Table 5 will be found the estimated population in 1914, 1913, 1912, 1911, and 1910 of each municipality having an estimated population of 25,000 or more in 1914, arranged according to population. The number of cities in this class is 252, and the text table in the next column shows the number in each group, with the cumulative total.

AREA AND POPULATION OF THE UNITED STATES AND ITS OUTLYING POSSESSIONS IN 1910 AND 1900, WITH THEIR ESTIMATED POPULATION FOR JULY 1, 1914, 1913, 1912, 1911, AND 1910.

* Incorporated since 1900.

¹ Oak Park township, coextensive with Oak Park village, incorporated from part of Cicero township in 1902.

² Includes population of South Danville and Germantown villages, annexed in 1906 and 1907, respectively.

³ Includes population of Winstanley Park village, annexed in 1902.

⁴ Includes population of West Freeport village and that part of Freeport township outside of Freeport city, annexed in 1907 and 1908, respectively.

⁵ Includes population (estimated at 600), omitted by enumerator in 1910, through a misunderstanding of the boundaries of his district.

⁶ Population, April 15, 1910; decrease since 1900; no estimate made.

⁷ Includes population of North Peoria village, annexed in 1900.

⁸ Includes population of Ridgely village, annexed in 1907.

⁹ Includes population (1,903) of Howell town, not legally a part of city; excluded from estimates.

¹⁰ Includes population of Irvington town, annexed in 1902.

ESTIMATES OF POPULATION: 1910-1914.

POPULATION IN 1910 AND 1900, AND ESTIMATES OF POPULATION FOR JULY 1, 1914, 1913, 1912, 1911, AND 1910, FOR CITIES HAVING 8,000 OR MORE POPULATION APRIL 15, 1910, AND LAND AREA ON JULY 1, 1913—Continued.

Table 4—Continued.
